AEROSPACE CLUSTER ASSOCIATION - ACA

Dear Partners,

Since its establishment in 2010 as the first Aerospace Cluster in Turkey, Aerospace Cluster Association – ACA has been carrying out a wide range of activities both nationally and internationally in supporting the growth of the Aviation and Space industries. Although its main offices being located in İzmir – Turkey, ACA has several members from different provinces of Turkey, which came together to promote two common goals. These are: “Supporting the growth of qualified technical pool of talent in the sector” and “Supporting its members (mostly SME's) to become competitively integrated in the global supply chain by fostering their innovation capabilities.

Developing Small and Medium Enterprises (SMEs) and supporting them to take place in the Aviation, Space and Defense sectors are among the most important strategic goals of our Association. In this context, we support our members to be a part of the highly competitive global supply chain in the related sectors by supporting their needs certification (AS 9100, NADCAP, etc.) and by providing support to access the sourcing opportunities and OEM's in these sectors as well as helping them to reach local and international funding.

On the other hand, Aerospace Cluster Association (ACA) is one of the first members of the the "European Aerospace Cluster Partnership (EACP)" (<http://www.eacp-aero.eu/>), which now has 45 clusters from 18 countries. EACP, which is an important network, along with its global initiative called Global Aerospace Clusters (GAC) come together in international events and discusses common problems and works to create collaborative partnerships through several EU and other funded projects.

In this respect, ACA has partnered in several projects collaborating with EACP member clusters including "2013 Leonardo da Vinci - Partnerships" project in 2013. In 2016, HipAir was another successful project with EACP clusters and SKY 4.0 project which was to promote soft skills for supporting the needs of Industry 4.0. In addition, an agreement of cooperation with the aerospace cluster in Poland "Aviation Valley" is ongoing.

Among the services we provide to our members, we can also count the international events we have prepared together with our partners like ESBAŞ (Aegean Free Zone). The purpose of these events is to enable our members to meet with national and international OEMs. Lastly, with the support of our Defense Industry Presidency (SSB) our international event called "The Conference on the Development of our National and Domestic Industry in the Defense and Aviation Sector with Global Collaborations" took place on 10-11 October 2019 where representatives from international companies such as Boeing, Airbus, Rolls - Royce and GE were present. Also, purchasing authorities of Turkish Foundation Companies (TSKGV) (like TAI, Havelsan, Roketsan, Aselsan, etc.) also took place and B2B activities were organized with the participation of our members resulted in successful negotiations.

As a new initiative, due to the COVID -19 pandemic which lead to working through virtual networks, ACA organized and will continue to organize online virtual events to promote the member activities and fostering the network between the buyers and the Turkish Suppliers.

As of January 2024, ACA has 67 members, of which 38 are sector companies. These companies generally serve in the defense, aviation, space and automotive industries. In addition to our member companies, we also have individual members, which are valuable academicians from important universities, R&D Centers as well as senior experts from the industries we serve.

For Further information please contact ACA Coordinator:

3D MODEL MÜHENDİSLİK BİLİŞİM MAKİNA VE DANIŞMANLIK SANAYİ TİCARET LİMİTED ŞİRKETİ

ABOUT US

It operates in 3D Model, engineering, design, 3D part modeling and manufacturing, dimensional analysis and verification.

AREAS OF EXPERTISE

While responding to the size and coordinate measurements, tolerance and quality reporting needs of companies with its high accuracy and repeatable mobile CMM, laser scanner and laser tracking systems; it is also involved in design and reverse engineering activities from scratch and in industrial or artistic design works. In addition, it becomes a solution partner by leasing high-tech measuring and scanning devices to companies and individuals. With its 3D printers with different features, it produces with 25 different materials for the fast model, prototype and pre-mass production stages of its customers and sells 3D printers of domestic and foreign origin. 3D Models, in every region of Turkey with its dynamic structure, automotive, aviation, defense, medical, architecture, offers precise and fast solutions to the petrochemical and similar industries.

ENGINEERING CAPABILITIES

- Reverse Engineering
- GD&T
- 3D Parça Prototype Production

CERTIFICATES

- ISO 9001-2015
- INNOVMETRIC POLYWORKS
- SOLIDWORKS

ALTEK METAL SAN. ve TİC. A.Ş

ABOUT US

Altek started its activities in 1987, trading aluminum between 1987 and 2007, in 2007, after the first factory installation, aluminum sizing, Aludur and Aludur plus under its own brand began to produce aluminum casting plate. At present, it provides reliable and fast service to its customers in Çerkezköy factory, Ankara, Gebze service centers and İkitelli retail sales point.

AREAS OF EXPERTISE

- ALUMINIUM CUT TO SIZE
- ALUMINIUM CUT TO SHAPE
- ALUMINIUM MACHINING
- MANUFACTURING ALUDUR&ALUDUR PLUS ALUMINIUM PLATES

ENGINEERING CAPABILITIES

- SIZING MACHINES
- DOUBLE COLUMN CNC
- ANNEALING FURNACES
- WATERJETS
- CUT TO LENGTH MACHINE
- CIRCULAR CUTTING
- ROUND BAR&FLAT BAR CUTTING MACHINES

CERTIFICATES

- A&D

AYJET FLIGHT SCHOOL

ABOUT US

AYJET Flight School is an aviation school, which was established by a select group of captain pilots with long years of experience in both Turkish Air Force and airline companies.

AYJET, with its experienced and knowledgeable expert personnel, increases the quality level with its own standards and practices, as well as complying with the rules and standards set by national and international aviation authorities in flight training.

AYJET has the authorizations to give Modular ATPL(A), ATPL(A) Integrated and Multi Pilot License (MPL) Integrated in flight training.

Aiming at Zero accident-incident in flight training, flight safety is a priority in AYJET Flight School. In this context; all maintenance activities of the aircraft are carried out by AYJET'S own SHY-145 Maintenance Organization. Compliance Monitoring Management and Safety Management System of AYJET, contributes to the highest level of protection of flight safety by conducting internal audits in various training and maintenance activities.

AYJET will always be your reliable friend, consultant and solution partner in all pilotage trainings.

AREAS OF EXPERTISE

- Moduler ATPL(A) Frozen Training Course
- Integrated ATPL(A) Frozen Training Course
- MPL Integrated Training Course
- MCC Training
- Advanced UPRT Training

ENGINEERING CAPABILITIES

- Aircraft technical processes within the scope of SHY-145 (maintenance, repair, modification, etc.) planning and managing

CERTIFICATES

- Approved Training Organisation Certificate
- CAMO Approval Certificate
- Maintenance Organization Approval Certificate (Part-145)
- Diamond Service Center

BAYRAMOĞLU GROUP A.Ş.

ABOUT US

Bayramoğlu Group of Companies has started its commercial life in the 1960s and for more than half a century, it is a long-established institution that produces value in many sectors and plays an active role in the national economy.

Bayramoğlu Group of Companies, which has an exemplary structure in its fields of activity since its formation; acts with respect to society and nature, with the belief of creating value, and is walking confidently to the future.

AREAS OF EXPERTISE

- Steel Construction Design and Manufacturing
- Design and Manufacturing of Steel Pipe Bridges
- Structural and Equipment based manufacturing within the scope of Nuclear Power Plant.
- All Kinds of Carbon Steel, Aluminum and Stainless Welded Construction and Mechanical Manufacturing
- Crusher Chassis
- Bunker Manufacturing
- Overhead Crane Bridges
- Silo Manufacturing
- Machine Chassis
- Bitumen Tanks for Asphalt Plants
- Pressure vessels
- Platform
- Plummet Protection
- Nuclear Power Unit

ENGINEERING CAPABILITIES

- Machining
- Sheet Metal Forming
- Welding
- Milling
- Holing
- Machining
- Grooving
- Tapping
- Bending
- Shielding gas welding
- Submerged arc welding
- Argon (TIG) welding

BODYCOTE İSTAŞ ISIL İŞLEM SAN. VE TİC. A.Ş.

ABOUT US

With more than 180 accredited facilities in 23 countries, **Bodycote** is the world's largest provider of heat treating and specialist thermal processing services. Through classical heat treatment and specialist technologies including Hot Isostatic Pressing (HIP), Bodycote improves the properties of metals and alloys, extending the life of vital components for a wide range of industries; including aerospace, defence, automotive, power generation, oil & gas, construction and agricultural machinery, medical and transportation. Customers in all of these industries have entrusted their products to Bodycote's care for more than 30 years. For more information, please visit www.bodycote.com

In 2006, "BODYCOTE" established joint venture with "İSTAŞ Isıl İşlem" in Turkey which are currently operating in three industrialized regions: **İzmir** (Kemalpaşa OSB), **Bursa** (Nilüfer OSB) and **Gebze** (Dilovası İMES OSB).

Integrated to Bodycote's Policies and complying to Quality System certifications (ISO 9001 and ISO 14001 certifications are Standard for all Plants; and also Gebze has AS9100D Aerospace Quality Management System, Izmir and Bursa have IATF16949 Automotive Quality Management System), Bodycote İstaş provide high quality heat treatment services to customers in CQI-9 standards.

AREAS OF EXPERTISE

"Bodycote İstaş" Plants are serving whole range of "Heat Treatment" processes (quality, reliable and on-time) to its customers with hi-tech and high capacity atmosphere controlled Sealed Quench furnaces (hardening / carburizing / carbonitriding / stress relieving / normalizing / annealing / aging), Vacuum furnaces (hardening / brazing / aging / sub-zero), Nitriding furnaces (Corr-i-dur / Gas Nitriding / Nitrocarburizing / Arcor) and Induction hardening machines (Medium / High frequency) at all Plants with competent and experienced employees.

For Aerospace industry applications, we are especially serving "through hardening, aging, solution heat treatment, precipitation hardening, carburizing process in Sealed Quench (oil quench) and Vacuum furnaces (gas quench).

ENGINEERING CAPABILITIES

Our GEBZE Plant is certified with AS9100D and serving to Aerospace and Defence Industry applying some special Heat Treatment specification like AMS2750, AMS2759, AMS-H-6875, STA-100-81-40, TPS382 etc. serving to both Military and Civil Aviation programs (Sikorsky, Agusta Westland, KAI, TAI's GMH/Atak Helicopter and TIHA, Roketsan, Aselsan etc.)

In order to serve for Boeing, Airbus, GE, Safran, Honeywell, ITP/Rolls-Royce etc, NADCAP certification process is started.

CERTIFICATES

- AS9100D
- IATF16949
- ISO9001
- ISO14001

MEMBER PROFILE

FOKKER ELMO HAVACILIK SANAYI ve TIC. LTD. ŞTİ.

ABOUT US

Originating from the regional aircraft manufacturer Fokker Aircraft, Fokker Elmo has an inspiring history and heritage. Fokker Aircraft was a renowned Aircraft Manufacturer, which was founded in 1919, and designed and manufactured aircraft until 1996. Today, using this background, experience, capability and know-how Fokker Elmo, a company of Fokker Technologies, has become a world leading company in the design, production and support of Electrical Wiring Interconnection Systems (EWIS), and electrical panels & boxes for the aerospace and defense industry.

Fokker Elmo is a global company with facilities in Turkey, China, India, the Netherlands, United States and Canada. Fokker Elmo Turkey is focusing mainly on Defense & Aerospace applications of wiring systems. Our facility is located in Izmir in the Aegean Free Zone.

AREAS OF EXPERTISE

Design and Manufacturing of Electrical Wiring Interconnection Systems (EWIS), and Electrical Panels & Boxes for the Aerospace and Defense Industry.

ENGINEERING CAPABILITIES

Fokker Elmo can take full responsibility for the design, making optimum use of our in house developed Wiring Design and Manufacturing System (WDMS). This tool, recognized by leading aircraft OEM's, supports the flexibility and configuration control in the Design Phase and when implementing changes it creates a direct (digital) link between the design data and the manufacturing and test control.

DESIGN & MANUFACTURING CAPABILITIES

There are many ways to make use of Fokker Elmo's knowledge and skills. Fokker Elmo can perform full design to customer's requirements, as well as Built to Specification as Built to Print.

Also from the production side, there are different levels. The customer can present Manufacturing Process Requirements and let Fokker Elmo define the specific finishing process (process, tools, tool settings etc.) and let Fokker Elmo perform a process qualification towards the Manufacturing Process Requirements.

On the other hand, in the true word of "built to print" the customer could deliver a form board (in file or hard copy format), and working instruction sheets, so Fokker Elmo only provides production labor.

In all cases, Fokker Elmo will use its unique WDMS tool to ensure configuration, quality and on-time delivery. The power of WDMS is proven by our performance for our customers including Lockheed Martin, Boeing, and Airbus.

Fokker Elmo capabilities and equipment includes Laser Marking, Braiding Equipment, Fully Automated Circuit Testing, Moulding and Assembly of complex Wiring Bundles and Electrical Panels & Boxes. Fokker Elmo Turkey is a fully ITAR proof facility, which enables it to perform on military programs.

FASTENER TECHNOLOGY BAĞLANTI ELEMANLARI SAN.TİC.A.Ş.

FASTENER TECHNOLOGY BESTAS

ABOUT US

Founded in 1993 in the Aegean Free Zone, our company is specialized in manufacturing aerospace fasteners. It was acquired by the French LISI group in 2001. FTB has all necessary production and testing means in house. It holds the quality system and special process certificates as well as customer approvals in the aerospace fasteners industry. It employs 536 workers.

AREAS OF EXPERTISE

Manufacturing aerospace fasteners (standard and special threaded fasteners in the range 3-20mm diameter; inserts and studs, nuts, washers, etc.)

ENGINEERING CAPABILITIES

Automatic and manual forging, heat treatment, CNC and conventional machining, thread rolling, plating, NDT, laboratory and testing,

CERTIFICATES

KAAN MAKİNA SANAYİ

ABOUT US:

KAAN MAKİNA has specialized in the production of aerospace precision machine parts and the processing of fine-tolerance rotating engine parts of structural and dynamic parts.

We have capability of production and testing of patented products and sub-assembly groups belonging to the customers.

We can develop processes regardless of the number of the parts needed by our customers.

We provide sustainable and common working conditions as the single provider of the customers in most critical parts with suitable costs.

AREAS OF EXPERTISE

KAAN MAKİNA uses modern chip removal technologies in 5-axis milling and turning applications and the highest quality of machine pool that is accepted worldwide.

We perform design and manufacture of all kinds of parts with our specialized high-level engineering team. We can simulate all processes from RFQ to finish part.

With our design capability we can use advanced manufacturing technologies.

ENGINEERING CAPABILITIES

- Advanced production techniques
- Development parts design for manufacturing
- Fixture design & manufacturing
- Working with solid 3D models
- Design and production of the fixture
- CAM programming
- Capability of design of the sub-system and parts
- HyperMILL 2019-2
- Measuring on the CNC with Renishaw Probs
- Tool measurement system

ABOUT US

Kale Pratt & Whitney is a partnership between Kale Group and Pratt & Whitney (division of Raytheon Technologies) was founded in 2010. Raytheon Technologies is one of the leading companies in aviation & defence sector. Additionally, Kale Pratt & Whitney is one of the leading aviation companies in Turkey and includes many qualified unique special process applications which is unique within Europe and the Middle East.

AREAS OF EXPERTISE

Our company's manufacturing technology includes new generation multi-axial machine , 5X Laser, Water Jet and Wire Erosion, Hydroform, Hot and Cold Forming, Mechanical presses, Automatic TIG welding machine, Electron Beam Welding Machine, Plasma (HVOF) Spray, etc. It also includes all types of destructive and non-destructive testing methods, vacuum heat treatment furnace and super cleaning processes. With approximately 400 qualified employees, the company has considerable experience in processing materials as titanium, super alloys , stainless steel & aluminum.

ENGINEERING CAPABILITIES

High skill set engineering capability where needed for Advance forming and machining with including product related tooling and gauge designs.

OZ OPTICS OPTİK TİCARET A.Ş.

ABOUT US

OZ Optics A.S. manufacturing facility founded in 2000 in Aegean Free Zone Gaziemir, Izmir and expanded its capacity and organization in Izmir with building and machinery investments starting in 2021. In addition to export portfolio, also plans to supply fiber systems in Turkey. Our seven different product groups are marketed and sold globally to over 10,000 customers in over 60 countries, through our well-established and extensive network of sales representatives and distributors, as well as through direct customer engagement.

AREAS OF EXPERTISE

Our fiber optic product lines include: Components for OE Packaging, Attenuators, Laser-to-Fiber Delivery Components, Polarization Maintaining Components, Test Equipment, Fiber Optic Sensors, High Power Components, and Fiber Optic Components for OCT Applications.

ENGINEERING CAPABILITIES

- Polarization Maintaining(PM) Components
- Hermetic Assemblies

OZ-CELİK SANAYİ LTD STİ

öz çelik

Öz Çelik San. ve Tic. Ltd. Şti.

ABOUT US

Oz-Celik is a company, established in 1987 by two mechanical engineers, and an economist, serving as machining industry.

Oz-Celik, which creates and produces world-class products according to different demands and needs of its customers with its research and development activities, constantly improves product quality, traceability and trust of its customers by following innovations and technological developments. However, it makes consumers, their customers and offers them the best service.

Primary targets of Oz-Celik, customer satisfaction and product quality. The outputs of each existing process within the organization, are associated with numerical data, and these outputs are regularly controlled by senior management. The company culture and goals are known to the employees and carry out their works with this cultural awareness.

Most of the employees are graduates of Industrial Vocational High School and Vocational High School, engineers work as department managers. All employees are provided with in-vocational training in line with their training programs, starting from the day they start work.

Oz-Celik serves mainly automotive, aerospace, defense, gas-electric water heaters and medical industry companies.

Since 2007, it has been exporting directly to Germany, France, Belgium, Netherlands and other European countries.

ENGINEERING CAPABILITIES

With the 8-axis CNC machines of GILDEMEISTER SPRINT series they work from the bar, they also carry out their productions in the range of Ø40-100 mm for low quantities.

With the knowledge and experience gained from the Quality Management System established in 1995, Oz-Celik has equipped quality laboratories consisting of Coordinate Measuring Machine (CMM), measuring microscope, camera measuring microscope, surface roughness device, hardness measuring device and other measuring devices and experienced quality personnel. It ensures the reliability of the parts and produces at low PPMs.

MEMBER PROFILE

INDUSTRY AND LIMITED COMPANY "ÖZKAYA MAKİNA "

ABOUT US Founded in 1976, Özkaya Makina takes as principle sharing knowledge and experience in automotive, aviation and industrial area and producing with new solutions.

With its expert staff located in two bases; İkitelli (600 square meters) and Gölcük (150 square meters) our staple productions are,

Apparatus, fixtures, spare parts, service equipment, special projects control fixtures for the use of Automotive Sector,

Control fixtures , measurement ,transport apparatus, and special projects for aerospace Filters are also our main production areas feature /sizes on demand and in field of industry.

Our mission is to improve and develop our competence in aerospace and defense industry in accordance with talents.

AREAS OF EXPERTISE

Our company,acts on the requests of our customers and partners for custom design and process, manufactured and sells its patented products.

ENGINEERING CAPABILITIES

Design
CNC proglamination CAM applications

MEMBER PROFILE

PAGETEL

PAGETEL

ABOUT US

PAGETEL designs and manufactures lightweight military shelters since 2001 at its facilities in Izmir. The shelters are used as mobile command and control centers for electronic warfare systems, air defence systems, communication and radar systems, and ground control and command systems for unmanned aerial vehicles. In addition to manufacturing the shelters, PAGETEL also provides full turn-key system integration and modernization solutions.

In line with customer requirements, PAGETEL produces and delivers shelters as bare or if needed, PAGETEL's expertise can be utilised to integrate all the required subsystems into the shelters for a turnkey solution.

PAGETEL's main customers include the Ministry of National Defence, the Turkish Armed Forces, domestic and international defence and aerospace companies, as well as NATO and NATO agencies (such as NC3A, NAMSA, etc.) and the armed forces of allied and friendly countries.

As the largest player in the defence and aerospace sector in its field, PAGETEL is capable of producing over 200 turnkey military shelters every year. Over 2,000 shelters carrying PAGETEL's signature are currently serving in the field. Modernization services are also provided for previously manufactured and deployed shelters based on user needs.

For its turnkey solutions, PAGETEL also designs and develops software to provide operators with information from all peripheral units, control these units, and establish automatic radio links between the systems.

PAGETEL can handle all processes from design to production and integration of cabling and various electrical distribution equipment in line with IPC-A-610 and IPC/WHMA-A-620 standards.

PAGETEL also provides engineering and technician support for mobile or fixed system integration projects abroad.

OUR CAPABILITIES

Design and Engineering

PAGETEL designs and integrates its indigenous solutions, operating in the defence and aerospace sector. The production process begins with shaping the designs according to the specifications defined by the end-user and the customer. The design, production, and integration of standard NATO&ACE shelters, as well as non-standard shelters upon request, are carried out through PAGETEL's innovative engineering approach.

PAGETEL offers preventive engineering solutions for RFI, EMI, EMP, TEMPEST, and CBRN threats in military shelters. With its deep knowledge and experience in military shelter design, production, and assembly services, PAGETEL is capable of creating custom-design military shelters tailored to meet user requirements.

Subsystem Concept Design

The design of a shelter starts with the agreement on the mission profile and the concept use defined by the end user. PAGETEL can not only provide concept designs for military shelters but for civilian shelters for the purposes of control, communication, and port security as well., along with the required subsystems.

Product Design

Based on the deployed location and the expected mission profile all system designs are carried out with the expertise and technology PAGETEL provides.

Analysis

All shelters produced at PAGETEL facilities, undergo thorough simulation and analysis, including temperature, static, durability, and air-flow to prepare for field testing. The most challenging field conditions are simulated in all analysis studies.

Prototype Development

PAGETEL can develop prototypes utilising cutting-edge technology in its field according to user requirements.

System Integration

Serial manufacturing and the integration of military shelters provided at PAGETEL's facility by the experienced workforce.

Production and Assembly

PAGETEL, capable of producing over 200 military shelters per year, performs all manufacturing operations including special processes like welding, chemical processes, painting and assembly for shelter cabins, as well as the assembly of electronical filter boxes and the installation of all cabling that are produced at PAGETEL's certified cable workshop, for the required integration of the systems into the shelter.

Testing

PAGETEL's Izmir facilities all the required testing equipment and devices to perform tests in line with ACE 6516/SHCPE/86 standards.

MEMBER PROFILE

PFW HAVACILIK SANAYI VE DIS TIC. LTD. STI. (PFW HS)

ABOUT US

PFW HS operates with 500 employees on 32,000 m² and is a major partner on many commercial airplane programs. The company offers a wide range of manufacturing capabilities. PFW HS provides its complex aerostructures and tubes & ducts on a turnkey basis and is a center of excellence within the PFW Group, a global network of specialized manufacturing plants.

2 major customers are Airbus and Boeing.

The company's capabilities allow it to progressively move up the value chain assuming a greater work scope for its partners. This often includes the delivery of complete products, installed and ready to join with the adjacent system elements.

Consequently, for each individual project we're able to create a cost-effective, logistically optimized solution. We have developed the social and cultural competence required to act as a true system integrator for the international environment. Through added value by utilizing Lean Management concepts, customers benefit by shortened lead times, consistent quality, and lower costs.

MAIN CAPABILITIES AND AREAS OF EXPERTISE

Structures

PFW HS' Structural Production capabilities are key strengths that are brought to the table. Based on our in-depth experience we have placed our focus on the continuous improvement of manufacturing technologies and Structural Production. Entering business in 2003, the company started its production with Additional Fuel Tanks of Airbus' A320 family passenger aircrafts. Since that time, PFW HS has enlarged its product range continuously, now including the Floor/Pressure Bulkhead, Belly Fairing and Ram

Air Turbine Frame of Airbus' A320 family aircrafts, the Inner Board Flap of A321, A400M Cargo Holding Structure and Additional Center Tank.

Key processes include: Drilling, Reaming, Sealing, Riveting, Heat Treatment, Chromate Coating and Painting.

Tube Systems

The continued investment in our skill base, capital equipment and process improvement enables PFW HS to manufacture a wide and complex variation of Tube Systems. In 2006, the company started its deliveries to Airbus and Boeing. Including A380, PFW HS has worked on every commercial program of Airbus and the 787 Dreamliner program of Boeing. Through a planned and controlled process, 6,000 different parts are handled and delivered with high on-time delivery performance.

Main operations are: Cutting, Bending, Laser Measurement, Alkaline & Organic Cleaning, Swaging, Orbital TIG Welding, Radiography, Pressure Testing and Marking.

CERTIFICATES

AS/ISO EN 9100, EASA Part 21G, Nadcap Approvals for Welding and Non-Destructive Testing, and Customer Approvals.

REPKON Machine and Tool Industry and Trade Inc.

REPKON

ABOUT US

REPKON is a provider of turn-key complete production plants for the metal forming sector as well as a designer, manufacturer and supplier of key metal forming machines for the global market, with a well established reputation for outstanding performance of Aviation & Aerospace and Defence Industry.

AREAS OF EXPERTISE

Recognized worldwide for its proprietary design and manufacturing know how, REPKON has been selling sheet metal forming equipment to producers across the globe since 1978. REPKON is a diligent supplier of custom-made solutions strictly focused on customer requirements with over four decades of track record for challenging conventional methods to come up with ingenious superior results with Flowforming Machine, Rotational Cold Forging Machine for Barrel Production, Shear forming Machine, Hot Spinning Machine, Press and Tooling Production.

SARIGOZOGLU

HIDROLİK MAKİNA VE KALIP SANAYİ VE TİC. A.Ş.

ABOUT US

SARIGOZOGLU A.Ş. was established in 1957 by İsmail Sarigozolu in İzmir, TURKEY. SARIGOZOGLU A.Ş. serves to the leading OEMs' of the automotive industry such as Ford, Tofas, Mercedes, Renault, BMW, Audi, Bentley, Volkswagen, Jaguar, Porsche with its knowledge, experience and technological power.

SARIGOZOGLU A.Ş. continues to grow and develop constantly with its investments in Manisa (1976), Aksaray (1999) and Bursa (2009). Currently **SARIGOZOGLU A.Ş.** is working in sheet metal forming and tooling in 3 different locations with 4 plants and 1015 employees since three generations.

SARIGOZOGLU A.Ş. carries out car parts and toolings' all production stages such as design, method, simulation, cad-cam, 2D-3D processes, assembly, under-press training, sample printing, measurement, reporting and is one of the advanced suppliers of the automotive industry with its this turnkey working style.

Even though **SARIGOZOGLU A.Ş.** produces mainly for automotive industry, but also produces white goods parts, especially inner and outer combi parts to Bosch in Turkey, France, Germany and UK for years.

AREAS OF EXPERTISE

Interior and Exterior Metal Car Parts and Tooling Production (roof panel, side panel, chassis, fender, engine hood, deck lid, battery case, underbed cabinet etc.)

STM SAVUNMA TEKNOLOJİLERİ VE MÜH. TİC. A.Ş

ABOUT US

STM Savuma Teknolojileri ve Mühendislik Ticaret A.Ş. also known as STM, was established in 1991 to render project management, engineering, and consultancy services to the Presidency of Defence Industries (SSB) and the Turkish Armed Forces (TSK) in areas where high technology is involved. Since then, STM has carried out such duties successfully while introducing various critical technologies to our country. STM has also been a leader in bringing domestic contribution rate in the Turkish Defence Industry up to its current level by bringing on board qualified expert personnel that is much needed for the procurement of high technology defence systems and the transfer of such technologies. STM has combined its work in various defence industry projects focusing on different software and platforms with its engineering know-how and the experience it has acquired over the years; this has led to the development of various projects and products in addition to its consulting activities. The technical know-how and experience acquired within the scope of consulting services have supported our departments that are working on other projects while the corporate experience fed by the operations in such fields has contributed considerably to our consultancy services

TERBAY MAKİNA A.Ş.

ABOUT US

Terbay Makina A.S. was established in 1954 in Izmir, Turkey. Currently we are serving Heavy Road Machinery, Maintenance Machinery, Tractor and Commercial Vehicle industries as OEM by supplying welded, machined and painted steel parts for serial orders. We export 90% of our production to Europe.

AREAS OF EXPERTISE

Production of sheet steel & profile parts for Heavy Duty Road & Maintenance Machinery, Commercial Vehicles, Agricultural Vehicles and Defence Industries. Close to 400 different parts are produced for Heavy Duty Road & Maintenance Machinery. Close to 2000 different parts are produced for Commercial Vehicles (for bus, minibuss, truck&vans). Close to 100 different parts are produced for Agricultural Vehicles. Close to 50 different parts are produced for Defence Industry. These productions are done as O.E.M for a given and approved production program.

ENGINEERING CAPABILITIES

- Laser and oxygen-plasma cutting
- Bending
- Stamping
- Machining
- Welding with jigs and fixtures

- Shot blasting
- Surface cleaning and painting (electrostatic powder coating and wet spray painting)

CERTIFICATES

- IATF 16949

MEMBER PROFILE

TİMSAN A.Ş.

ABOUT US

Timsan Tractor which is the sole and single manufacturer of Diesel/Electric Powered Baggage, Cargo, Aircraft Tow and Push Tractors and Helicopter Carrier Platforms in Turkey, was established in Izmir Ataturk Organized Industrial Zone in 2010.

As per the new trend in the ground support operations for clean airports concept, Timsan Tractor has intensified its resources to develop Battery Driven Electric Powered Equipment with its expert team of 20 Employees in 2.000 m² Area.

Timsan Tractor has manufactured 130 aircraft and baggage tow/push tractors which were delivered to the Civil and Military Customers All Over The World, in a 10-Year Period (till 2020) starting from its establishment date.

Timsan Exports 60% of its turnover. Timsan tractor's products are used in 13 countries including Tunisia, Algeria, Cyprus, Iraq, Tanzania, Philippines, Sri Lanka, Azerbaijan, Kazakhstan, Italy, Romania, Saudi Arabia and Pakistan.

AREAS OF EXPERTISE

Timsan Tractor specializes in the production of diesel and electric propelled luggage, cargo, aircraft towing vehicles and helicopter carrier equipment.

ENGINEERING CAPABILITIES

Timsan Tractor prioritizes aesthetic, quality and most of all safety rules dictated by national/international standards on its products.

As per the current interest is highly focused on reducing the carbon emission, Timsan Tractor is giving high priority to develop electric driven vehicles for clean environment and working hard to include such items in all categories of its product line.

To create added value to our national economy, Timsan Tractor is manufacturing the most of the items previously procured through import in its activation area and delivering successfully to domestic and international customers. With this special capability, Timsan Tractor has achieved a well-known name in International market.

CERTIFICATES

- ISO 9001:2015
- Certificate Of Domestic Goods

MEMBER PROFILE

VOLKAN İTFAİYE ARAÇLARI SAN. TİC. A.Ş.

ABOUT US

Volkan İtfaie is a company that designs and manufactures fire trucks and fire-fighting related products for specific needs.

AREAS OF EXPERTISE

- CAD-CAM supported production techniques,
- Model making and moulding,
- Design improving with various analyzing softwares,
- Prototyping and design-check capabilities,
- Pump test unit which complies with the norms of EN1028-2,
- Complex framework settlement and welding,
- Composite manufacturing,
- Integrated paint and coating facility.

ENGINEERING CAPABILITIES

Operating a R&D Center with 35 engineers. Being able to design through methods of CAE. Which includes finite element analysis (FEA), computational fluid Dynamics (CFD), multibody dynamics (MBD), durability and optimization. It is included with computer-aided design (CAD) and computer-aided manufacturing (CAM). Highly effective on Electronics design, production and test capabilities.

VOLT TECHNOLOGY DEVELOPMENT AND ENGINEERING INC.

ABOUT US

Volt Defense offers its innovative products to the global market in defense industry and aviation fields by combining its unique design and advanced technology capabilities with high production power. Electric motors and drivers provide power transmission systems, weapon and ammunition subsystems, and continuous development and sustainability in electromechanical drive systems from R&D to integrated logistics support process. It improves its integration and design experiences in line with the principle of 'localization' and supports Platform and System manufacturers in line with their needs.

AREAS OF EXPERTISE

With its experienced staff and high-tech benches in its facilities established in a 45.000 square meter closed area; Machining, Coil Winding, Mounting, Lamination, Metal Injection, Plastic Injection Mold Manufacturing, Cabling, Wire Erosion and Painting processes.

Design Volt Defense, making high-tech electrical, electronic, mechanical designs and analytical models; it also has prototype and mass production capabilities.

And also; setting up an automatic production line; design and production of test systems; machine, mold, apparatus design and production projects.

YUNA MAKİNA

ABOUT US

Yuna Makina is Kemalpaşa izmir based CNC machining and spare parts solution partner for automotive, defence and medical sectors.

Bringing high quality and affordability through production efficiency and project management experience serve as key aspects of Yuna Makina's professionalism in customer relations, as well as providing secure and sustainable working environment for employees.

Yuna Makina's production capacity is designed to be suitable for both prototype and mass production machining orders. This enables Yuna to sustain long lasting relationships with customers due to tailor-made solution providing capacity aligned with market demands.

Yuna Makina understands the value of sustainability and preservation of the environment while ensuring longevity of its products. In this context while withholding customer satisfaction as our primary goal, we are and we will continue to stay behind of every product rolled out of our production line.
